

THE KADER CONNECT

Week beginning: 02/11/20

Welcome to the Kader connect, Kader's weekly round up! Here we will be sharing insight into what is going on here at Kader across all year groups and celebrating our lovely children!

Thought for the weekend
Lest we forget!

A Poem to Ponder...

Remembrance Day

They shall grow not old, as we that are left grow old:

Age shall not weary them, nor the years condemn.

At the going down of the sun and in the morning

We will remember them.

A message from Mrs Mitchinson

Lock down!

Unfortunately, we are now entering another 4 weeks lockdown. I know this isn't ideal, but looking around school at all of the lovely children, I think it's so important that we all try to remain as upbeat as possible, be kind, be strong and carry on. We can do this!

Rocket spectacular!

Year 5 literally blew me away with their fantastic Rocket creations this week. Well done Year 5!

Mr Laverick's keep fit task..

Create your own obstacle course at home (inside or outside) and get the whole family to join in! Time each family member and let us know who wins via SeeSaw!

Nursery

PE in the 'BIG' hall! We had a fantastic opportunity this week to have a PE lesson with our resident sports extraodinaire (Mr Laverick) who taught us all a new 'bean' game!

Reception

Unfortunately, Reception had to isolate this week. We are so proud of the fantastic effort so many of our children put into their online learning. A big thankyou to the Reception staff for using Seesaw so well this week. The online interaction was brilliant.

Remember to get some fresh air & exercise.

Year 1

Number Fun! During our math lessons, we embraced the great outdoors by drawing number lines on the playground to help us complete our number sentences. We have all been super mathematicians!

Year 2

This week we had a lovely trip out and went on a walk around Acklam. We wanted to look at the local landmarks and discuss what we could find. We found Acklam Hall, the Avenue of Trees and Acklam Library.

Year 4

We have started our new topic this half term. We began by researching all about the Romans and what they have done for us Britons! We couldn't believe how much they influenced our life today! Look at the fabulous research we did. We were so proud.

Year 3

Mighty Metals! Scientists galore this week in Year 3 as we have investigated the laws of friction- how different materials affect how an object moves across a surface. It has been so much fun!

Year 5

This week, by the power of imagination, we were visited by Neil Armstrong (AKA Miss Olley) and Buzz Aldrin (AKA Mr Hurley)- the first two men on the Moon landing of 1969. We asked them lots of interesting questions.

Year 6

Exploring fractions has been our maths focus this week! We used practical equipment to cement our understanding of mixed numbers and improper fraction. Ending each session with a fractions competition! It's fair to say we have some very competitive mathematicians!

Mrs Donalds - What made me smile!

I loved to see how excited the Year 1 children were this week when they had the opportunity to explore upper school playground and all of the new playground markings. Their little faces wondering down the corridor really cheered me up!
