

THE KADER CONNECT

Week beginning: 14.2.22

Welcome to the Kader connect, Kader's weekly round up! Here we will be sharing insight into what is going on here at Kader across all year groups and celebrating our lovely children!

Thought for the weekend
WE HOPE ALL OF OUR CHILDREN HAVE A LOVELY, RELAXING HALF TERM!

Mr Lavenick's keep fit task..

A message from Mrs Mitchinson

I wish you all a lovely Half Term! See you all back in school on Monday 28th February!

Nursery

After reading the next section of our story of the week, 'Dear Dinosaur', Nursery created their own postcard to send to their favourite dinosaurs!

The boys and girls have also been extremely busy making Valentine's Day decorations. We had lots of fun making shaving foam hearts, hand printed cards and especially making our own love heart biscuit!

Reception

Reception have had a lovely week celebrating Valentine's Day. They particularly enjoyed making Valentines love potions which included lots of wonderful things. You've all been amazing this half term, Reception! We hope you all have a fantastic half term and we will see you soon!

Year 1

In English, we went back in time to 1666 when the Great Fire of London was happening. We were asleep in our beds and awoke to the smell of disgusting smoke. We looked out of our windows and saw orange fire spreading. Houses were collapsing.

Year 4

This week Year 4 continued to learn about the human digestive system. We drew the vital digestive organs on a t-shirt and painted over them. Once dry, we used the image to describe the digestive process. The activity took a lot of 'guts' but the children rose to the challenge.

Year 2

Year 2 have had a very busy week! We started our week with a Valentine's disco – it was lots of fun! In maths, we have been learning about division. We used *Unifix* blocks to help us understand how to divide numbers into smaller equal groups.

Year 3

This week in Maths we used trundle wheels and rulers to practise measuring in both centimetres and metres. We recorded our results in a table and used our prior learning to convert the measurements from cm to m and m to cm. We went outdoors to measure the length of different areas of the playground and field while recording our findings!

Year 5

How is it the last week of term already?! We have had a busy week carrying on our work on fractions, decimals and percentages in Maths and doing our big write in English. We have finished our class story, *Children of Winter*, and the children have written their own historical story based on the book. They have written their socks off this week and we are so proud of them! The children have also designed their own shields in topic, looking at colour and design, including colours and animals they feel are representative of their own personal traits. Well done to our lovely girls who took part in their football competition this week and came third - great job! Have a wonderful half term!

Year 6

This week in Year 6, we learned how the speed of light waves change when they travel through transparent materials, such as water or glass. We discussed how this causes the rays of light to change direction and bend and that this is known as refraction. Here are some fun photos of us looking at refraction in action!
